**Bank of America Stadium, Scoreboard Demo**  
Charlotte, NC

DHG contracted by Turner Construction to provide selective structural demolition during this stadium renovation project. Scope of work included the demolition of the two scoreboards leaving the main structural columns and lower levels only; restroom demolition was included to make way for the new AV room. All of the work was performed 200' above stadium seating and concession stands. Very tight timeframe requiring 7 days a week schedule. Work completed safely and on time.
