**Plant Riverside Dismantlement
Savannah, Georgia**

DHG contracted by Georgia Power to perform the asbestos abatement and dismantlement of historic 165,000 sf power plant in Savannah, Georgia. Work included the complete removal of (8) turbine generators and (7) boilers and all ancillary equipment in the plant. Work also included the removal of two concrete turbine bases.

Previous work at the plant included the dismantling of (3) package boilers and associated 135' tall boiler stacks, (2) steel boilers and 10,000 gal water tank.
